

**USEPA Brownfield Grants:
Proposal Preparation & Grant Administration
Week of October 18-22, 2004**

We expect 2004 USEPA Brownfield grants to be awarded in September 2004 and the Notice of Fund Availability for the next round (2005) to call for new applications in or about November 2004. Two two-day sessions will be specially designed by USEPA Region V Brownfield staff; one for grantees and another for potential grant applicants.

One session will use the experience of the 2004 grant cycle to develop guidance on how to prepare proposals for USEPA's brownfield grants.

The second session will review the various aspects of local administration of these grants (everything you need to know to administer a USEPA Brownfield Grant).

Preference will be given to participants from Region V, but a limited number of slots may be available to those outside the Midwest.

Please watch this page for changes, including draft agendas as they are developed.
